RESEARCH INTERESTS	Computer Vision (Image Generation Models, Style Editing) Vision-Language Models Human-Computer Interaction		
EDUCATION	Ph.D. in Interdisciplinary Studies of Artificial Intelligence (ISAI), DGIST, Daegu, Korea. Aug. 2025 – Present Advisor: Prof. Sunghoon Im M.S. in Interdisciplinary Studies of Artificial Intelligence (ISAI), DGIST, Daegu, Korea. Feb. 2023 – Feb. 2025 Advisor: Prof. Sunghoon Im B.S. in Data Science Major, School of Information Convergence, Kwangwoon University, Seoul, Korea. Mar. 2017 – Feb. 2023 Major GPA: 4.03/4.5

WORK EXPERIENCE	Researcher, Korea Electronics Technology Institute(KETI), Korea, Mar. 2025 – Jul. 2025 — Hologram Research Center, Computer Vision Researcher. Undergraduate Intern, Kwangwoon University, Korea, Jul. 2021 – Dec. 2022 — Human-Centered Computing Lab, Conducted Industry-University Projects (IITP).		

AWARDS	- Encouragement prize, 32nd HumanTech Paper Awards, — Samsung Electronics Co., Ltd. Jan. 2026 - Encouragement prize, 30th HumanTech Paper Awards, — Samsung Electronics Co., Ltd. Jan. 2024 - Academic Scholarship, Mar 2022 — Spring · Fall Semester, 2021; Spring Semester, 2022 Mar, Sep. 2021
REVIEWER	Association for the Advancement of Artificial Intelligence (AAAI) 2025
PROJECTS	Multi prompt-based image generation Jul. 2024 – Feb. 2025 NIPA, Innovation Hub AI Data Convergence Project. Hyperparameter comparison for text-to-image diffusion models with fast sampling. Improving the performance of image editing models via query injection.
	CCTV Event Detection Sep. 2023 – Feb. 2024 ETRI Daegu-Gyeongbuk Research Division, CCTV Event Detection Module Based on Deep Learning and Foundation Models. Development of an event detection module using object tracking model, Data processing.
	Video Tagging and Video retrieval Mar. 2023 – Aug. 2023 10kM, Industry-University-Linked Project. Video Tagging with Scene graph generation model, video captioning with prompt engineering, develop word-based video retrieval method.
	Development and Commercialization of AI-based Self-training and Monitoring Solutions for Patients with Parkinsonism, Apr. 2022 – Dec. 2022 IITP, ICT R&D Innovation Voucher Project. Facial rehabilitation technology research, Facial expression classification modeling.
	Dog face landmark detection Jul. 2021 – May. 2022 Kwangwoon Univ 6th SW Industry-University-Linked Project. Construct facial landmark detection model and implement model to the application.
PATENTS	- Method for Generating Personalized Image in a Non-Learning Style Using a Scale-Based Autoregressive Model, (10-2025-0099672) - Method for Generating Style Aligned Images Using Autoregressive Model, (10-2025-0054822, PCT/KR2025/021066) - Content-Adaptive Vector Quantization-Based Non-Learning Style Switching Technique, (10-2024-0166851) - Content-Adaptive Style Switching Device and Method Using a Non-Learning Method Using a Vector Quantization Model, (PCT/KR2025/018425) - Computer Program for Text-Based, Object-Oriented Style Transfer, (10-2847608) - Computer Program and Method for Style Transfer, (10-2804933) - APPARATUS AND METHOD FOR ANALYZING LEARNING PATTERN, (10-2819801).
SKILLS	Language: Python, HTML/CSS/JS (Front-End), Android Development and Data Analysis: Pytorch, Numpy, Pandas, scikit-learn, process-mining Design: Figma, Adobe XD
